Objective:

SingNano provides the network for the Singapore Nanotech community.

Who Should Attend:

Govt Funding Agencies, Investors, Distributors, Industry Safety Managers Hearing Protection Specialists, Mobile companies and those interested and active in the field of NIHL (Noise Induced Hearing Loss)

PRESENTATION ABSTRACT

Sensear Pty Ltd is conducting a global investor roadshow as it seeks capital to facilitate its rapid growth for the world's first and revolutionary patented technology that simultaneously suppresses background noise and elevates speech.

Trillions of dollars are set to be invested into Infrastructure development over the next two years in order to provide economic stimulus for many countries including China, USA and Australia. Award winning Australian technology company Sensear is set to buck the backward trend in earnings growth currently being experienced by many companies, through applying its advanced set of products in the delivery of these infrastructure projects. Infrastructure developments such as bridges roads, ports and rail all create noise exposure for workers. Sensear's revolutionary technology filters speech from background noise.

With government regulation tightening on hearing protection in order to curb the growth of Noise Induced Hearing Loss, now the world's largest occupational illness, Sensear's newly commercialised products are uniquely positioned to allow not only protection but also situational awareness and importantly all forms of communication whilst wearing protection. In just six months since releasing its products, the company has sold into North America, Asia, Australia and Europe to clients such as Qantas, Alcoa, Rio Tinto, Boeing and select military units. Justin will not only detail the company's success to date but also detail the exciting prospects ahead and how Singapore can help to play its part in its growth through capital, operations and logistics.

ABOUT THE SPEAKER

Mr Justin Miller: Founder & CEO – Sensear Pty Ltd (Australia). He is also a founder and Non-Executive Director of Watershed Corporate, a business that provides commercialisation consultancy to Start-Ups and SMEs. He was a finalist in the Ernst & Young Entrepreneur of the Year award (2003 & 2004) and was a winner of the 2004 WA Business News 40 under 40 Award. He was also an elected member of the WA Branch Executive Committee for the Australian Information Industry Association (AIIA) since 2005.

Justin has a keen knowledge of the global technology marketplace, which he has developed over the past 20 years from various technology related positions. Justin has successfully founded and managed the aggressive and profitable growth of ICT companies; which has included strategic acquisitions, capital raisings, multi million dollar sales deals, and significant staff growth. Until 2005, Justin held the position of Founder & Managing Director of Empired Limited which is listed on the Australian Stock Exchange (ASX).

ABOUT SENSEAR PTE LTD (www.sensear.com)

Sensear is an Australian technology company that has developed the Patent Pending **SENS®** (Speech Enhancing Noise Suppressing) technology, the world's first speech enhancement device that enables clear safe communication in high noise environments. Sensear is currently targeting high noise industrial and mining sectors where Noise Induced Hearing Loss is major safety consideration.
